# Samsung is moving ahead and with our customers

Samsung's differentiation is centered on producing innovative technology that brings genuine change to people's lives. We do this by bringing a relentless focus on customer experience and product innovation in everything we do. Our pursuit of the best technology does not end with our products, however. We are committed to continuously anticipating the needs of our customers as the basis for the successful launch of our products.

As a global leader, Samsung will continue to create future with our customer.

## Global Business Network

# 'Eco-friendly' Samsung

## Preserves the nature you live in.

Thinking of you and the environment, Samsung plans for the future. Realizing your hopes for a greener, healthier life for you and the generations that follow, Samsung's environmentally friendly technologies work to make the world a more beautiful place.

### Air & Water Conservation

As a leading innovator of environment-friendly products and technologies, Samsung products already drastically reduce the strains on nature's valuable resources. Samsung uses R-600, a natural refrigerant, and cyclopentane insulation in its refrigerators, which do not promote global warming and does not add to the greenhouse effect. Samsung's water-efficient washing machines also use less detergent and water without effecting cleanliness, helping to conserve water.

### Use Less, Save More

Samsung Microwave Oven has the world's lowest standby power consumption. The amount of the standby power consumption is much more than we expect, and the standby power is one of big reason of expensive electric bill. The Eco button dramatically reduces this standby power consumption.

### Global Recycling

Samsung Electronics is making significant efforts to save the environment and complies with the WEEE (Waste Electrical and Electronic Equipment) directive by joining or establishing the recycling schemes for each country.

# Feature

Offers a comfortable environment with innovative technology. The Perfect solution for the sweetest moments of your life.

# Ceramic Inside

Samsung uses Ceramic Enamel for functionality. The Ceramic Enamel Interior is exceptionally smooth and allows grease and oil to be easily cleaned off. The ceramic heater allows the food to be cooked to perfection.

Ceramic interior for hygiene, strength, and even cooking performance.

## What is Ceramic Enamel?

A ceramic is an inorganic, nonmetallic solid prepared by the action of heat and subsequent cooling. It is often understood as a material like pottery. Technically, if something contains more than 40% of SiO<sub>2</sub>, it can be called Ceramic Enamel. Samsung Ceramic Enamel is consisted of 45% of SiO<sub>2</sub>.

## How to make Ceramic Enamel?

Ceramic Enamel is made the same way as making high quality pottery. After fusing the powdered ceramic to steel, it is then fired at 830°C. As the SiO<sub>2</sub> melts at the high temperature, it creates a smooth surface and nice gloss.

**Ceramic Heater**  
Ceramic for better cooking performance.

## What is Ceramic Enamel for?

Ceramic Enamel is very durable. It can withstand daily wear and tear. As a result, the Ceramic Enamel is easy to clean, hygienic, and prevents odor transfer.

**Ceramic Enamel Interior**  
Ceramic for anti scratching and anti bacteria.

**The Same way to make Pottery**  
Ceramic Enamel is durable as it is fired at 830°C high temperature.

### Anti-Bacterial Protection

Cavity with a damaged surface becomes best place to grow bacteria. The Cavity of Samsung's Microwave Oven is applied anti-bacterial coating made by Ceramic Enamel material. So, Samsung's Ceramic Enamel Interior is hygienic and prevents bacteria build-up. (Anti-bacterial 99.9%\_Tested by Hohenstein, Germany)

### Easy to Clean

The Ceramic Enamel Interior offers a solid surface that never scratches. Moreover, it prevents bacteria, and the smooth surface is easily to clean.

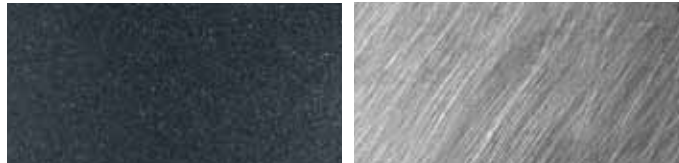

SAMSUNG  
Ceramic Enamel Interior

### High Scratch Resistance

Ceramic Enamel's durable qualities make it more than 7 times scratch and rust resistant than other microwave interiors.

SAMSUNG

Stainless Cavity

	The First Failure Load (N)
Ceramic Enamel	14.18
Stainless Steel	< 2
Epoxy	< 2

According to the Scratch Resistance Test <Tested by KRISS, KOREA>, the Ceramic Enamel Interior is 7 times stronger than stainless steel or epoxy painted interiors. This is the same high quality interior as that of traditional electric ovens.

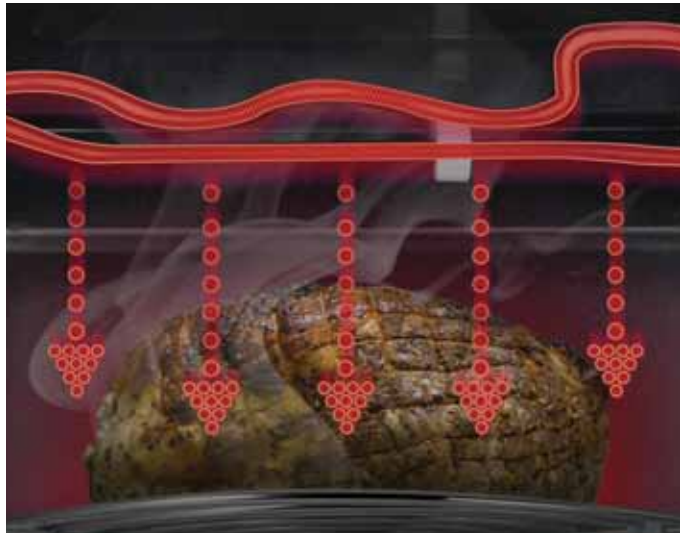

### No discoloration

Food elements including greases, oils, spices and animal protein can cause severe discoloration and cleaning issues.

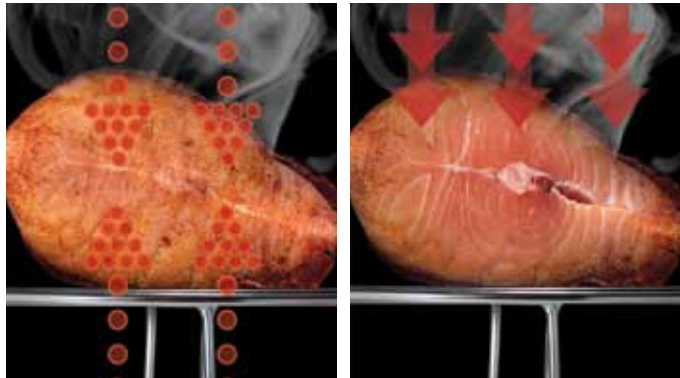

### No Odor Transfer

Ceramic Enamel Interior does not adsorb moisture, odor or flavor, so there is no transfer of smell or flavor during the next cooking process.

### More Even Cooking Result

The Ceramic heater works together with the Ceramic Enamel interior to distributes far infrared heat to the food reducing cold spots.

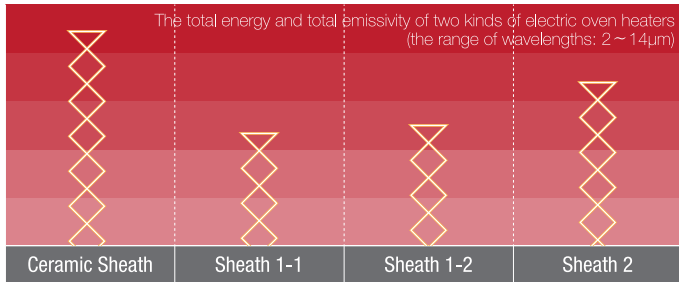

SAMSUNG

Conventional

### Deeper penetrating FIR (Far Infrared Rays) from ceramic heater

Ceramic heater has higher FIR Spectrum emissivity, which makes it easy for the ray to be absorbed by food. Well absorbed ray makes food cook faster and better.

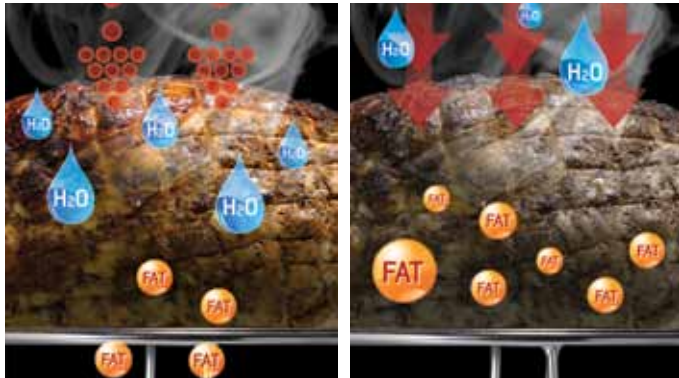

Samsung ceramic heater emits FIR 1.5 times more than convectional heaters.

\* The conversion values were calculated using the actual measuring data of spectral emissivity at 600°C~800°C. (Tested by Toray Research, Japan)

### Healthy and Delicious Cooking

The Ceramic heater burns away excess fat so that you can enjoy healthier and great tasting meals without losing juiciness or the nutritional contents.

## Omnisense System

The weight sensor linked to the turntable detects weight and the humidity sensor detects humidity. Microwave oven automatically adjusts cooking time and mode accordingly.

## Weight Guide

To measure the weight of your food easily without any hassles

## Defrost Plate

An innovative defrosting plate elevates the food above the melting water to keep food fresh.

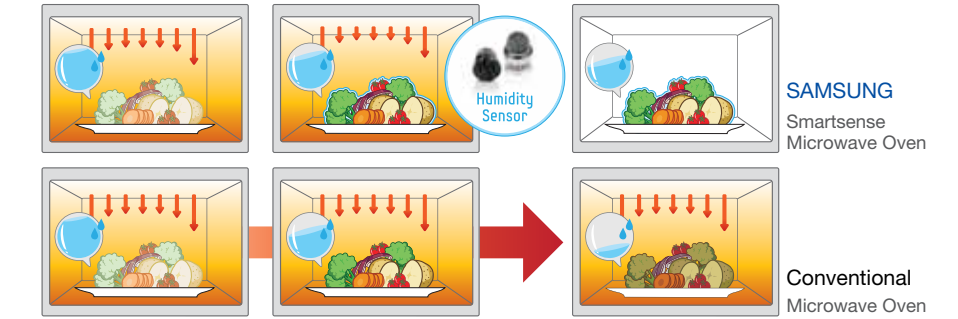

Delicious dishes that retain optimal moisture

# SmartSense

The innovative Smartsense enables you to not worry about over or under cooking. It can sense the humidity of the food's surface, and enables the Microwave Oven to adjust the optimum cooking mode & time automatically. No more worry - just enjoy delicious meals without the fuss.

## Smartsense

The smartsense can detect the humidity of the food's surface, and can adjust the optimum cooking mode and time for the best cooking performance.

## Effortless cooking with humidity sensor

Just a touch gives you delicious dishes. Smartsense eliminates the need to check on the food. You no longer have to worry about over or under cooking.

Prepare dishes and reheat.

Check the humidity and adjust temperature & cooking time.

Serve delicious foods.

## Smartsense Cook Menu

Prepare a wide array of dishes, ranging from simple reheating to cooking more complex dishes.

The innovative and efficient approach to Eco-friendly lifestyle.

# ECO MODE

Samsung microwave oven has the world's lowest Standby power consumption. You can save 40% on Standby Energy.

## Eco Button

Even if you shut down the microwave, it still uses electricity to maintain its essential features. The Eco button can dramatically reduce this standby power consumption.

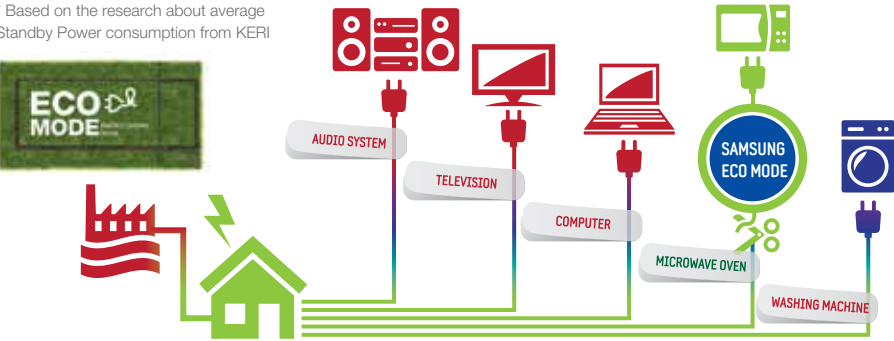

## Standby Power Consumption

All appliance use standby power. Standby power consumption is much more than expected, and is one of the big reasons for expensive electricity bills.

### Monthly Energy Waste caused by standby power

\* Based on the research about average Standby Power consumption from KERI

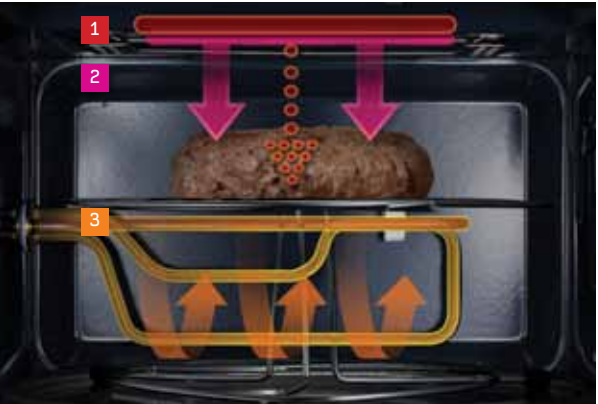

Enables food to be perfectly browned and crisped

# Super Grill

Samsung Super Grill is an extreme power grill with three heating sources. The Triple Grill System heats food from both the top and bottom simultaneously, so that food becomes perfectly browned and crisped.

## Fast cooking with three grilling heat sources!

Experience the ultimate cooking performance from the Samsung Super Grill. It has fabulous features and is intelligently designed. Enjoy a delicious feast at your next dinner party.

- 1 Ceramic Heater (Far Infrared Rays)**  
FIR penetrates more deeply in food while keeping food moist and juicy.
- 2 Quartz Heater**  
Boosts the taste of food with its speedy operation for express cuisine.
- 3 Sheath Heater**  
Accelerates the cooking process.

## Various cooking modes with movable grill

Movable Grill  
Features versatility and convenience

Sleek and smart design combined with simple functionality

# CMF Design

CMF(Color, Material, Finish) Design is the specialized features that offer a strong emotional identity. Samsung continuously develops CMF factors not only for emphasizing beauty but also increasing functionality.

## Leading Style Microwave Oven

Samsung's latest Microwave Oven offers high style perfectly fitted on your kitchen. The style is carefully considered in CMF design trend and functionality factors. Samsung applies CMF design with stainless steel, mirror, hot stamping, and pattern.

Stainless steel is popular material because of its' shiny appearance and luxury images. Black colored or mirrored is also considered attractive color trend. Hot stamping offers strong impact.

## Artistic Kitchen Style

A subtle difference in the design of Microwave oven alters the style of whole your kitchen. All aspects such as a front panel's texture, finishing material, pointed color, etc deliver additional value of the style. Samsung's microwave oven leads evolved lifestyle and is perfectly fitted in not only simple & modern style kitchen but also elegant & luxury style kitchen.

Healthy and nutritious foods with ease

# Pro Steamer

Samsung microwaves offer the Pro Steamer which looks sleek and professional with its metal lid. Large enough to fit big dishes, it also features a crusty plate as an additional accessory that works like real ovenware for amazing results.

## Steam Cook and Crusty Plate

Pro Steamer enables water within the bottom plate to boil and generate steam. The stainless steel lid blocks microwave rays, but rather cooks the food with the generated steam. This cooks food healthily while at the same time retaining moisture and nutritional value.

# 3D Heating

The 3D Heating System cooks food more thoroughly and evenly by uniquely distributing microwaves throughout the oven.

## Triple Distribution System

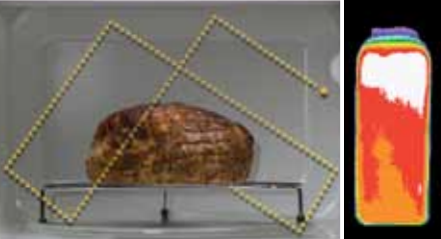

A conventional wave distribution system distributes microwaves from a single Aperture Antenna. In this case, microwaves are concentrated to a particular part of the food. To overcome this problem, Samsung developed TDS, which cooks every part of the food evenly with an Aperture Antenna as well as two additional slot antennas so that waves can be more widely distributed.

Efficient emission of microwaves translates into better cooked food. Models with this triple distribution system will bring the benefit of more even cooking to customers unhappy with the performance of their old microwave ovens.

Healthy, succulent cooking at its best

# Real Steam Cooking

Samsung's new Combi Steam Oven is equipped with inovative steam and speed cooking technology. Real Steam Cooking leaves food crispy with a golden brown crust. This is a healthy way to roast or bake.

## Hassle-free steaming

The oven is equipped with a large capacity water tank which enables hassle-free steaming. The real steam cooks food to perfection in a shorter period of time.

### 800ml Water Tank

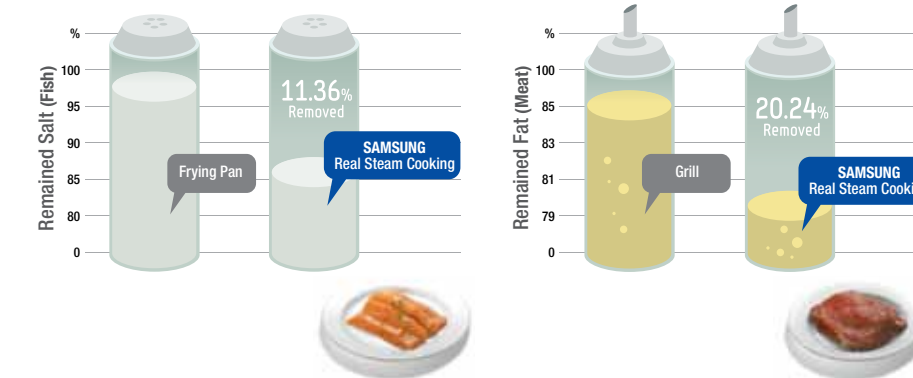

The lid of the water tank is removable, allowing you to easily clean the container as needed. Once you fill the tank with water, there is no need to refill or add water while you're cooking. A display alerts you when the water level is low.

### Decalcifying System

You can set-up or change your water hardness. Samsung Combi Steam Oven alerts when you need to clean the steam generator periodically. You can easily clean inside the oven without additional equipment.

## Real Steam Cook

Steaming in the oven leaves food crispy with a golden brown crust, that is a healthy way to roast or bake. Steam your food with real steam (70-100°C) from the steam generator.

Faster cooking times

# Speed Cooking

In a busy day, most people don't have enough time to cook a complete meal, and instead search for unhealthy alternatives. Samsung's Compact Oven comes with Speed Cook, which enables you to cook wholesome food in a shorter time.

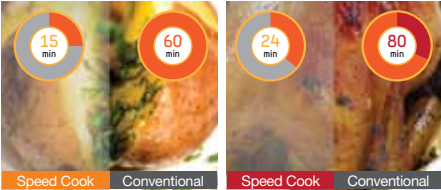

## Surround Heating System

With one convection vent on the left side, dual movable grills on the top, a bottom grill and stirrer at the back, this compact oven is versatile enough to handle all your cooking needs.

 **4 Times faster**  
than conventional oven

Speed cook technology is the best solution for faster and more even cooking. Multiple heating sources reduce your cooking time, giving you spare time to do more important things.

## Multiple Heating System

Convection

Convection vent generates heated air circulation for better cooking performance.

Grill

Dual movable grills with far infrared rays enable you to add crisp and crunch to your food.

Microwave

Stirrer microwaves cook the food deeply, evenly, and more tastily.

Oven style browning & crisping

# Crusty Plate

Crusty Plate helps to heat frozen foods such as pizza, making it taste like freshly ordered pizza. This amazing feature makes frozen foods tasty and crispy with perfect results.

## Deliciously Crunchy Results

Try the Samsung Crusty Plate for frozen foods such as pizza, baguettes, quiche and chicken nuggets. Give traditional recipes a crispy texture. You can also bake, and even fry without oil.

Add the food after preheating and activate the Crusty Cook button for deliciously crispy food.

## Grill Cooking

Top located Grill heats up the food. It becomes ideal for baking pastries, quiche and roasting or grilling meat and fish.

## Crusty Plate Cooking

Crusty Plate transfers the heat to the bottom of the food. It offers oven-style browning and crisping to both the top and bottom of dishes.

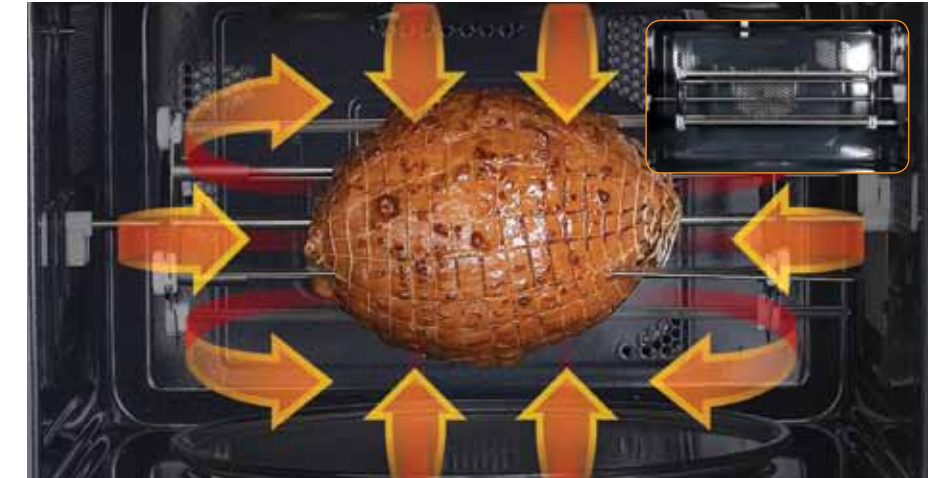

Barbecue with ease in your own kitchen

# Rotisserie

Rotisserie roasts meat skewered on a spit as it revolves over the heat source. The rotating device cooks the meat evenly and in its own juices. It also allows easy access for continuous basting if desired.

## Barbecue-Style Cooking

Skewered-style cooking, such as kebabs and barbecue, is now possible in your own kitchen. With rotisserie cooking, meats become more tender, juicier, and easier to baste.

Just put the rotisserie attachment into place whenever you need it.

## Setting up the Rotisserie

Fit the two end pieces together.

The basic form is complete. The form is solid and will not come apart easily.

Place the 4 single spits through the holes in the 4 corners. The Rotisserie is now set up.

Skewer style cooking to create a variety of dishes

# Multi Spit

The unique Samsung Multi-Spit provides skewer-styled cooking, such as kebabs and roast meats, enhanced by the even heating system. The simple process offers huge convenience when cooking in the kitchen.

This unique feature gives you more choice for cooking enjoyable food. Skewered-style cooking such as kebabs and barbecue is now possible in your own kitchen.

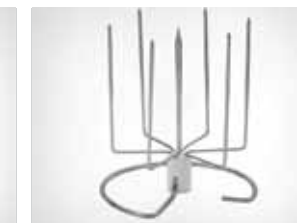

Convection Heat

Even Cooking with Rotating Plate

The spit sits on a rotating plate. The convection heat is distributed evenly and all the fat drips down to the plate for healthier food.

The spit is designed for easy cooking and cleaning.
